Welcome and Getting Started Guide!

Welcome to <u>Preparing for the Associate Cloud Engineer Examination</u>!

By enrolling in this course, you'll be joining an international community of future Associate Cloud Engineers, who work to deploy applications, monitor operations, and manage enterprise solutions on Google Cloud.

What to expect during this training course?

During this training course, you will be presented with a series of modules that will take you through the various aspects of understanding and formulating your own study plan to prepare for the Associate Cloud Engineer certification exam. The modules in this self-paced course have videos, lab exercises, and helpful knowledge-based links to aid you in your learning experience.

The six learning modules in this course are:

1. Understanding Associate Cloud Engineer Certification
2. Setting up a cloud solution environment
3. Planning and configuring a cloud solution
4. Deploying and implementing a cloud solution
5. Ensuring successful operation of a cloud solution
6. Configuring access and security
